CONTACT INFORMATION	1 Cyclotron Road Lawrence Berkeley National Laboratory Berkeley, CA 94720	(510) 486-6175 john.groh@lbl.gov
EDUCATION	University of California, Berkeley Ph.D., Physics (Advisor: Prof. Adrian Lee) M.A., Physics	2021 2018
	The Pennsylvania State University B.S., Physics and Mathematics with Honors in Physics	2014
PRESENT POSITION	Staff Scientist <i>Physics Division, Lawrence Berkeley National Laboratory</i>	2023 - present
RESEARCH EXPERIENCE	Postdoctoral Fellow <i>Physical Measurement Laboratory, National Institute of Standards and Technology</i> <i>Physics Department, University of Colorado, Boulder</i> <ul style="list-style-type: none">Developed a 1,820-channel microwave SQUID multiplexer for TES bolometer readout, doubling the current state-of-the art and enabling future large-format detector arraysAdvanced the status of the Simons Observatory and ALICE telescopes through production, integration, and testing of cryogenic detector and multiplexed readout components	2021 - 2023
	Graduate Student Researcher <i>Physics Department, University of California, Berkeley with Prof. Adrian Lee</i> <ul style="list-style-type: none">Developed large-format detector array electrical and cryomechanical packaging for the Simons Array cosmic microwave background polarization experiment.Developed the multiplexed detector readout electronics for the Simons Array and SPT-3G cosmic microwave background experiments.Integrated and commissioned the 1st Simons Array telescope in the field.	2015 - 2021
	Undergraduate Research Assistant <i>Department of Physics, Pennsylvania State University with Prof. Douglas Cowen and Prof. Tyce DeYoung</i> Developed analysis methods to identify track-like neutrino interactions in the Precision IceCube Next Generation Upgrade and investigated alternative electronics infrastructures for its detector modules.	2013 - 2014
	Undergraduate Research Assistant <i>Department of Physics, Pennsylvania State University with Prof. Jorge Sofu</i> Performed Density Functional Theory calculations and Kinetic Monte Carlo simulations of C_{60} monolayers on a $Ag(111)$ substrate.	2012 - 2013
	Undergraduate Research Assistant <i>CERN, with Michele Floris and Alexander Kalweit</i> Performed high-level quality assurance checks of ALICE Pb-Pb collision data and mi-	2012

grated analysis of inclusive charged hadron p_T spectra to more scalable data format.

Undergraduate Research Assistant

2011 - 2012

Department of Physics, Pennsylvania State University with Prof. Stephane Coutu

Assisted with upgrade and commissioning of the CREAM cosmic ray instrument for its 2012 flight, set up an ISO 100,000 clean room for satellite component assembly, and designed and tested components for the Boronated Scintillating Detector on the ISS-CREAM experiment.

TALKS AND
PRESENTA-
TIONS

Invited talk: *A 1,820-channel multiplexer for TES bolometer readout*, 20th International Conference on Low Temperature Detectors, Daejeon, South Korea, July 2023

Poster presentation: *Crosstalk effects in microwave SQUID multiplexed TES bolometer readout*, 20th International Conference on Low Temperature Detectors, Daejeon, South Korea, July 2023

Pointing Superconductors at the Sky: Highly multiplexed sensor readout for precision measurements of the cosmic microwave background, PEAR seminar, NIST, Boulder, CO, March 2023

Pointing Superconductors at the Sky: Towards new physics through ultra-sensitive cosmic microwave background measurements, Research Progress Meeting, Physics Division, Lawrence Berkeley National Laboratory, Berkeley, CA, March 2023

Development of a 1,820 channel microwave SQUID multiplexer for large-format TES bolometer array readout, Applied Superconductivity 2022, Honolulu, HI, October 2022

Invited talk: *Microwave multiplexed readout for large Transition-Edge Sensor arrays*, 15th International Workshop on Low Temperature Electronics, Matera, Italy, June 2022

Poster presentation: *Microwave SQUID multiplexing of TES bolometer arrays*, NASA IRSTIG Workshop, Boulder, CO, March 2022

Fundamental physics from the cosmic microwave background with the Simons Array, LEPP Journal Club, Cornell University, February 2021

First year status and performance of the POLARBEAR-2a cosmic microwave background instrument, SPIE Astronomical Telescopes + Instrumentation, San Diego, CA, December 2020

Anomalous frequency noise in superconducting lithographed megahertz resonators, Applied Superconductivity, Virtual, October 2020

Electronics for precision cosmology: Scaling up the multiplexed detector readout for the Simons Array CMB polarization experiment, KIPAC Tea Talk, Stanford University, October 2019

Status of the POLARBEAR-2a CMB Telescope, APS Meeting, Denver, CO, April 2019

Status of the POLARBEAR-2a experiment, CMB Lunch Talk, Lawrence Berkeley National Laboratory, February 2019

So you want to measure B-modes?, Graduate Student Seminar, UC Berkeley, October 2018

SUCCESSFUL
CO-AUTHORED
GRANTS

Next generation bolometric microwave SQUID multiplexer
PI: John Mates, NIST Boulder
Agency: NASA
Proposal No.: 21-APRA21-0066

2023–2026

Total budget: \$1.3M

HONORS AND AWARDS	Finalist, Postdoctoral and Early-career Association of Researchers Accolade	2022
	National Research Council RAP Postdoctoral Fellowship	2021 - 2023
	NSF Graduate Student Research Fellowship	2015 - 2020
	Paul Axt Prize	2014
	Douglas and Regina Evans Award for Research Achievement	2014
	Student Marshall, Pennsylvania State University Department of Physics	2014
	Barry M. Goldwater Scholarship	2013 - 2014
	Phi Beta Kappa	2014
	Sigma Pi Sigma	2012 - 2014
	John and Elizabeth Holmes Teas Scholarship	2011 - 2014
	Schreyer Academic Excellence Scholarship	2010 - 2014
	Summer Discovery Grant, Pennsylvania State University	2013
TEACHING	University of California, Berkeley	
	<i>Graduate Student Instructor</i> , Physics 111: Basic Semiconductor Circuits	2014 - 2015
	Pennsylvania State University	
	<i>Tutor</i> , Introductory Physics and Calculus	2012
	<i>Volunteer Tutor</i> , High School Calculus	2011 - 2012
